DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Wylie et al., U.S. 2004/0149431.

Regarding claim 1-67, Wylie et al. discloses recording and displaying means for (0146) generating a summary of a drillstring in each hole section in response to data (0167), generating a diameter of the first and second drill collar (0124) with respect to the drift diameter, generating an outer diameter of a heavy drillstring for various sized boreholes (0021,0022), generating weight on the bit (0258), first collar or section (324) and second collar (318) of the drill string, generating lengths for the first and second collars or sections (0257), determining tension (0426), cost (0225) and kick tolerance (0213).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Boulton et al., U.S. 6,269,892 discloses a similar method.
